

**Project Design Phase-I**  
**Proposed Solution Template**

Date	November 05
Team ID	PNT2022TMID34495
Project Name	Smart Solutions For Railways
Maximum Marks	2 Marks

**Proposed Solution Template:**

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	<ul style="list-style-type: none"> <li>✓ The smart solutions for railways is designed to reduced the work load of thee user and also the use of paper and also provides the live location of the train.</li> <li>✓ I the busy world, the public is need of online booking process. Now a days, in the railway station the people are don't waste the time for taking in ticket counter.</li> <li>✓ The passengers are struggling to get tickets in the time from ticket counters. So they like to switch over online ticket booking.</li> </ul>
2.	Idea / Solution description	<ul style="list-style-type: none"> <li>✓ The webpage is designed in which the user can book tickets and will be provided with a OR code which will be shown to the ticket collector will be scanning the QR code to get the passenger details.</li> <li>✓ The webpage also shows the love locations of the train by placing a GPS module in the train. The booking details of the user will be stored in thee database which can be retrieved anytime.</li> </ul>
3.	Novelty / Uniqueness	<ul style="list-style-type: none"> <li>✓ A QR code will be provided by the webpage to the user which will reduce the paper work.</li> <li>✓ All the booking details of the customers will be stored in the database with a unique ID and they can be retrieved back ,when the ticket collector scans the QR code. You can also view interactive seat map.</li> </ul>
4.	Social Impact / Customer Satisfaction	<ul style="list-style-type: none"> <li>✓ The booing ticket is made easy to use and it is also reliable and no need to go to station for booing tickets and the</li> </ul>

		<p>transaction process is also made easy.</p> <ul style="list-style-type: none"> <li>✓ The customer will be notified on email as well as cell phone on all confirmation and cancellations.</li> </ul>
5.	Business Model (Revenue Model)	<ul style="list-style-type: none"> <li>✓ With this solution-By using this applications, the customer can schedule their destination, view interactive seat map and select their seat for their convenience.</li> <li>✓ Without this solution- they have to travel to the station to book tickets and also have to carry their tickets to show tickets collector.</li> </ul>
6.	Scalability of the Solution	<ul style="list-style-type: none"> <li>✓ No need of taking print out.</li> <li>✓ Counter ticket had to be handled with care, but SMS on mobile is more than enough.</li> <li>✓ You are becoming environment friendly and contributing for greener plant by ignoring printout.</li> <li>✓ No need of taking out wallet and showing your ticket to TTR, just tell your name to TTR that you are passenger with a valid proof.</li> <li>✓ While booking counter ticket you had to carry cash and while booking E-ticket you are paying through online directly from bank which makes work more easy for you.</li> </ul>
